How can you manage your Trades? PLAN 1

We suggest you to divide your total volume of equity reserved for each signal into three equal volumes.

(Meaning 3 position each signal - equal lots size – according to our money management PLAN 1)

This is, when the signal comes out we must enter three orders/deals instantly & respectively:

- 1. First order set take profit on take profit 1 (TP1)
- 2. Second order set take profit on take profit 2 (TP2) only for swing traders
- 3. Third order set take profit on Take profit 3 (TP3) only for swing traders
- 4. Set Stop Loss (SL) for three orders.
- 5. When First Order hits take profit 1 (TP1) move Stop Loss (SL) to entry price (Breakeven) For Second and Third orders.
- 6. Swing Traders when Second Order hits take profit 2 (TP2) move Stop Loss (SL) at take profit 1 (TP1) for Third order.
- 7. Swing Traders once the price has reached close to take profit 3 (TP3)

Move stop loss to Take profit 2 (TP2) and let running trade to reach our (TP3)

Most important! Never close our trades earlier before reaching TP! Almost all

Our trades reach TP! So do not worry! Do not try to close any profit position earlier. The result is important. Patience is the key

NOTE: If you want to take risk, do not move Stop Loss (SL) to entry price for remaining both orders until hit Take profits (TP2, TP3)

Plan 2: OPTIONAL - Trading involves the possibility of financial loss. Only trade with money that you are prepared to lose, you must recognise that for factors outside your control you may lose all of the money in your trading account. **TradeWithSam** takes no responsibility for loss incurred because of our trading signals. How can you manage your Trades? PLAN 2

We suggest using only one position for each signal! If you follow all 3TP with only one position – then close manually 70% at TP1 – 30% at TP2 – 10% at TP3 After reaching 1TP move your SL at entry point

BE (BREAKEVEN)

Example: If you opened 1.00 lot - close 70% at TP1 = 0.70 - 30% at TP2 = 0.30 and rest 10% at TP3 = 0.10

(Meaning 1 position each signal – according to our money management PLAN 2)

This is, when the signal comes out we must enter one orders/deals instantly & respectively:

- 1. First order set take profit on take profit 1 (TP1)
- 2. Set Stop Loss (SL) for each positions you open!

Most important! Never close our trades earlier before reaching TP! Almost all

Our trades reach TP! So do not worry! Do not try to close any profit position earlier. The result is important. Patience is the key

We will book profit together for sure!

Thank you
